February 10, 2010

In response to the significant medical need in Haiti after the January 12<sup>th</sup>, 2010 earthquake which devastated Port-au-Prince and many surrounding cities, HALO has focused on medical relief efforts to support the wounded and amputees.

The mission is to develop wound care clinics by providing medical supplies and medications to existing small community clinics. HALO encourages members, partners, and friends to provide assistance at the existing facilities. HALO also plans to support the amputees long term by facilitating rehabilitation and counseling. By targeting small community clinics, we believe that the injured can more easily obtain regular care and follow-up without having to travel long distances.

Sincerely,

Angelo E. Gousse M.D.  
HALO President
